Answer plot yield results

Analysis Questions

- Data:
 - Calculate your percent yield. Show your work for full credit.
 - Melting point range
 - Proton NMR spectra with:
 - Structure
 - prediction table showing shift, integrations and splitting
 - each peak labeled with associated proton(s) in structure
- Discussion: Explain how your data gives evidence of correct product identity and purity. Include:
 - A comparison of expected melting point of product with actual melting point
 - NMR spectra with that of starting material as well as what is predicted for pure product.

Solution :

X	Y	dx = X - 65	dy = Y - 116	dx ²	dy ²	dx dy
61	112	-4	-4	16	16	16
68	123	3	7	9	49	21
68	130	3	14	9	196	42
64	115	-1	-1	1	1	1
65	110	0	-6	0	36	0
70	125	5	9	25	81	45
63	100	-2	-16	4	256	32
62	113	-3	-3	9	9	9
64	116	-1	0	1	0	0
67	125	2	9	4	81	18
652	1169	2	9	78	725	184

$$\bar{X} = \frac{652}{10} = 65.2$$

$$\bar{Y} = \frac{1169}{10} = 116.9$$

$$b_{yx} = \frac{N\sum dx dy - (\sum dx)(\sum dy)}{N\sum dx^2 - (\sum dx)^2}$$

$$= \frac{10(184) - (2)(9)}{10(78) - 4}$$

$$= \frac{1840 - 18}{780 - 4} = \frac{1822}{776} = 2.348$$

∴ Regression equation of Y on X is

$$Y - \bar{Y} = b_{yx}(X - \bar{X})$$

$$\Rightarrow Y - 116.9 = 2.348(X - 65.2)$$

$$\Rightarrow Y - 116.9 = 2.348X - 149.96$$

$$\Rightarrow Y = 2.348X - 153.09 + 116.9$$

$$\Rightarrow Y = 2.348X - 36.19$$

When the height is 69 inches,

Put X = 69 in the above equation we get,

$$Y = 2.348(69) - 36.19$$

$$\Rightarrow Y = 162.012 - 36.19$$

$$\Rightarrow Y = 125.822 \text{ lb}$$

- Obtain the two regression lines from the following data N = 20, ΣX = 80, ΣY = 40, ΣX² = 1680, ΣY² = 320 and ΣXY = 480

Solution :

Given N = 20, ΣX = 80, ΣY = 40, ΣX² = 1680, ΣY² = 320 and ΣXY = 480

What does it mean to yield results. Yield positive results. What does the percent yield tell you about your results.

Farmers are encouraged to consider data from more positions, more than years and to be aware of how these agronomic conditions could affect the results. While we are unable to meet this year this year, the replies texture program is still strongly strongly stronger through more virtual events hosted by our Winfield United Agronomy team. Winfield United Answer Plot locations, however, has not just been built to facilitate sales conversations. Target spray applications and clean fields. Answer Plot and Closclan are registered trademarks of Winfield Solutions, LLC. NK is a registered trademark of Syngenta Group Company. All photos are owned by Winfield United or used with permission. Pioneer is a registered trademark of Pioneer Hi-Bred International, Inc. All rights reserved. Our local lands, more our response texture data allow us to order through these new introductions in an unsatisfactory way. Due to the factors outside Winfield Solutions, the control of the LLC, the results to be obtained, also but not limited to yields, financial services, profits, losses or other, cannot be provided or guaranteed by Winfield Solutions, LLC. The collection of the harvest depends on several factors that many of which are beyond Winfield United control, even without limitations, type of terrain, parasites pressures, agronomic practices and weather conditions. Photos are owned by Winfield United or used with permission. Dekalb and Asgrow are trademarks of the Bayer group. For example, the Acre Acre RX program can help you implant the right population, determine which acres to apply nutrients and fungicides to protect the potential of ROI and make adjustments in season to your plan. "Everything to help you Your performance goals. Or, better yet, take a walk with your local Winfield United Retailer to see what you are going forward and how you can apply those results to your fields. The results are, I am, from field observations and can change as further data are collected. The performance of the harvest depend on several factors that many of which are beyond Winfield United control, even without limitation, type of land, plague pressures, agronomic practices and weather conditions. It is your resource for localized intuitions that you can trust to choose the best products for your land types combined with the right management practices. At this time, about land half has specific Acre RX advanced tests to see where the approach and prescription program exploits the maximum impact. Through the print events of the virtual response, we shared the importance of these five fundamental decisions that you can't jump if you want to set up your crops for optimal profitability potential to the harvest. Based on over a decade of research, we have developed simple scores to help you know how any hybrid will answer a nitrogen, fungicide, population density and corn-on-corn conditions. You don't have to wait for an event to visit a position of the texture of the answer, though. To keep up with the sector, we turn over 50-70% of our soy line-line every year. 2019 Winfield Solutions, LLC. Together with this, it focused on the efficiency of nitrogen use (Nue) and how to incorporate it into a complete approach of systems. Here are three Takeaways Takeaways from this year's response texture program. What management practices do they work better? Each fundamental is supported by research and supported by our product portfolio. Soybean variety: the soy industry has a terrible zangulation when it comes to traits and variety. XTendFlex and enroll E3A and E3A. How should farmers manage Dicamba, glyphosate and glufosinate with these systems? NK is a trademark of Syngenta. The Advanced Acre Acre RX program is an agronomic prescription service built so as and where the fact in the farm phase. For information on these products and services in other territories, please contact WinFieldCusticeservice@landlakes.com CAINDA CAINTING AC TRANSPARENCY ATCH Link For information on our products and services in Canada, visit WinfieldUnited.ca Important: before use of the products Reading and always follow the instruction label. A farmer the texture teams showed that the value of fundamental 5 in helping farmers to make profitable decisions. The R7A tool is also a great way to incorporate the texture data response to your farm. DEKALBA and ASGROW are registered trademarks of Monsanto Company. A, designed for corn and soy, the program guides a return on farmers input investments and offers a guarantee of services for performance (yield) to give you the security of investing even in difficult economic times. Contact your local retailer for the latest collection data to inform decisions for next season. The collections of the harvest depend on several factors that many of which are beyond Winfield United control, even without limitations, type of soil, plague pressures, agronomic practices and weather conditions. Test graphs are the tag bets for most seed and chemical companies. You can stop at any time to verify your progress. It is simple: farmers want to see how a product will perform before they invest. Advanced Acre Acre, reply Plot A and Winfield A are Winfield United trademarks. Maximizing plant health. We're not looking for A single product will work anywhere. If you like to stop from a position of the reply plot, find some closest. But how do you put them all together? A 2022 Winfield United. This year, we have completed our trials of the plot of answers with innovation tests, where our innovative innovative They were able to go to the company to conduct large-scale tests. Answer The plot, Croplan, Advanced Acre, R7 and Winfield are Winfield United trademarks. It is for almost 25 years, various hybrids, variety, crop protection products, management practices, population density and more have been tested in response to the plot resorts, producing decades of detailed research. Another unique aspect of the reply printing program is the answer to the score system. Farmers should evaluate data from more positions and years every time it is possible. We are pleased to share it. Today there are positions through u.s. And Canada, each carefully selected by geography to represent various field conditions and soil types of local farmers. These selected retailers and their farmers combine our data with product performance results so you can carry out products more effectively to improve both the return on investment (ROI) and the performance potential. MyCogen is a registered trademark of MyCogen LLC. Increase of the focus on the total ACRE approach: rather than watching seeds, fertiliths, crop protection and management decisions as separate conversations, we are looking at all these factors as a holistic system. We hope that farmers will take what they have learned fundamentals 5 to help adapt management decisions for 2021. However, whenever a new stretch, product or practice affects the market, we incorporate it to ensure that A farmer come across. Just ask your local property and managed Winfield dealer at local level or reach a Winfield United Agronomist. Some products that appear on this site may not be registered for sale or use in all or countries within the United States. Brevant and Pioneer are trademarks of Corteva Agrance and its affiliated companies. A, Winfield United has quality data that is ready to help you concentrate your decision-making process and put the right product in the right right place right To get an optimal return. It is your resource for localized intuitions you can trust you to choose the best products for your types of land combined with the right management practices. CA residents - not selling my personal information | Privacy Policy Products and Services Promoted on www.winfieldUnited.com are only available in the United States. A, A 2020 Winfield United. Here are some of the new things we are looking at 2021. We also believe a closer look at the relationship between fertility and fungicides and as a coupled approach can help improve yields. A, A "Keep our data blocked or our best textures. We try to find consistency and make up that it works best to drive performance consistent for local needs.

Mitigate the stress of the early implant. We will also test almost all culture protection products and micronutrient on the market, allowing you to see an impartial comparison of your options and learn what works under certain conditions, what is not because. Head and testifies to products in variable field conditions so you can make the right input decisions for your crops. Optimize plant nutrition. Crop results depend on the impact of many factors beyond Winfield United control, including no limitation, reduced performance due to time, soil variations and can even reflect differences in agronomic practices. A, a, - a, also where the plot of the answers arrives. In response of the plot's resources, we evaluate the performance of all seed brands sold through our system, including Winfield United Cloplan, NK, Brevant, Asgrow, Dekalb, Pioneer. Fertility and sustainability: capacity and timing of fertility have evolved over the last few decades. See how the work of the program Texture of this year's reply can help you build a strong plan for 2021. IMPORTANT: Before use, always read and follow the label instructions. The answers to Mais-on-On scores can help you choose the best hybrid for Acre and Answer: The population can help you determine the optimal seedlings rates. The collection of the harvest depends on several factors that many of which are beyond Winfield United control, even without limitations, type of terrain, parasites pressures, agronomic practices and weather conditions. Anyone can provide seed data, many can provide fertility data, some can also offer herbicide data and adjuvant performance. About 80% of the reply printing tests remain consistent every year so you can continue to build our reliable data library. Along with our retailers, we host the answers of texture events during the growth season, both in person and practically, to share what is going in real time. Your hub go-to for localized intuitions and guided by data. These changes require complete data and information to make these decisions sustainable. Answer The search for the texture robbed a light on the positioning of the product. It is important: before use, always read and follow the label instructions. Check with the local extension service to confirm the status of the current recording. We also work to identify problematic trends and models a little in advance when they can present themselves in your fields so you can enter the plot and show how to manage it. For 21 seasons, the WinField United Response Program delivered for cutting-edge agronomically live and personally in locations throughout the country, providing guided data recommendations to help inform decisions about your acres. This year, our agronomists have demonstrated Advanced Acre RX through the reply printing program and the updates shared practically so you can determine if it's a good fit for you next season. Complete diffusion offers farmer options and provides a strong platform for searching which options fit better to each farm. Answer: to fungicide and answer: Nitrogen scores provide a unique way to identify season management tactics that could improve yields. We advanced acre with a new prescription of the season season Farmers are encouraged to consider data from more positions, more than years, and be aware of how these agronomic conditions could affect the results. A © 2021 Winfield United. Through performance data, performance sampling and loan products, the plot of responses is adapted to drive forward operation. They designed to dig deep and provide farmers with complete intuitions they need to make well-complete and well-informed decisions for their activities. Companies.
